To the PUBLIC, New-York, Oct. 16.

IT is now upwards of six Years that I have published a weekly News Paper, under the Title of the *New-York Gazette or Weekly Post-Boy*, which I have the Pleasure to think has been generally acceptable, and publicly useful: But having now Occasion to alter the Title of my Paper, I hope for the same favourable Reception of the *NEW-YORK JOURNAL or GENERAL ADVERTISER*, that my Paper met with under the former Title; since it will be conducted with the same Spirit, and to the same Ends,—the Suppression of Evil, and the Promotion of public and private Happiness. The Reasons of altering my Title are these, 1st, for the Sake of Distinction, as I am inform'd Mr. PARKER intends to publish a Paper under the former Title; and 2d, because, as he formerly publish'd a Paper under that Title, I would not avail myself of any Advantages from a Name originally assumed by him. The Number, for the Sake of more easily settling with my Customers, will run regularly on from my last Week's Paper. Perhaps, when Opportunity permits, I shall procure a Cut for the Head of my Paper, till which Time, it will be published in its present Form.

ABRAHAM GOVERNEUR.

On Thursday last arrived here Captain Effingham Lawrence, in six Weeks from London, by whom, and by sundry other Vessels arrived here, and some at Bolton in short Passages, bringing English Papers till the 16th September, we have the following Advices.

AL TEN A, August 5.

IT is reported, that thirty thousand troops, long accustomed to fight under a chief inured to fatigue, are this moment advancing towards the Duchy of Lunembourg, not as friends, but in an hostile manner. Letters from London predicted this event six or seven weeks ago; but we can scarcely yet believe it, till we have a confirmation, which, if there is any foundation in the report, may be hourly expected.

Constantinople, July 4. On the first instant a building which had been weakened by the late earthquakes fell down, some persons were buried in the ruins; and several others much hurt by this accident.

The plague begins to appear here, and rages more in the suburb of Pera than in any other part of the city.

They write from Salonica, that the Bahaw of Yaffini had passed near that city, at the head of 13,000 men, on his march towards Varna, where he was to embark for Georgia: it is said that some other small bodies of Albanians were marched on the same destination.

Civita Vecchia, July 14. The English Consuls residing in foreign countries have received orders from their Court to take away the English passports, which the Genoese ships had obtained at Port-Mahon and Gibraltar; and the Governors of those places are forbid to furnish any for the future to neutral powers.

Genoa, July 9. From Corfica we hear, that the Chiefs of the Rebels have orders to assemble immediately, in order to give a decisive answer to France.

They are building ships of war in great haste at Toulon; where 1500 men are likewise employed on the fortifications.

Leghorn, July 21. A letter from Insula-Rossa in Corfica imports, that trade flourishes greatly there, and particularly in oil, with which they abound this year. 'Tis added, that several foreigners have established different manufactures in that Canton, which is become the richest and most commercial in the whole island.

Constantinople, July 15. The Rebels in Cyprus are become so powerful, that they had, on the 5th of June, actually formed the blockade of Nicotia, the capital of the Island, and would not permit provisions of any sort to be carried into the city, though the inhabitants were in great want; and they threatened to lay siege to the town in a few days.

Paris, Aug. 8. The 22d ult. a violent storm happened at Verdun-sur-Garonne, in the district of Toulouse, where the hail fell with so much force, and in such abundance, that in half an hour's time all that remained upon the land of the harvest was carried off by the torrent: a little rivulet, which runs through the town, overflowed with so much impetuosity that upwards of 100 houses were under water, many of which received great damage, and some of them were thrown down: the torrent also swept away a great deal of furniture out of the houses, and several persons were drowned. The wind was so high at the same time, that it unroofed many houses in the town and neighbourhood, tore up the trees for a considerable distance, and entirely destroyed the mulberry-trees, the plantations of which are very considerable in those parts. The church belonging to the community of Pilleport was blown down by the wind, and twelve persons buried in the ruins.

Vienna, August 16. A few days ago a French Courier passed through this city, in his way from Constantinople. The Letters which he has brought,

far from confirming the retreat of Prince Heraclius, say, that the shocks of the Earthquakes, and the progress of that Prince cause an extraordinary consternation at Constantinople. Prince Heraclius had very newly beat a large army of the Turks in Natolia; and the Porte, alarmed at these successive disasters, was drawing together troops and military stores from all parts, in order to send them off thither by land or sea.

Genoa, August 16. By a vessel lately arrived from Bastia we learn, that an accommodation will soon take place between the Republic and the Corsicans; and that two Ministers, one French, the other English are daily expected on the island, to put the last hand to the Treaty.

L O N D O N.

Aug. 4. Mrs. Draper, Midwife to her Majesty, will remove in a few days to Richmond, to remain in waiting against the Queen's lying in.

It is said, that Lord Camden will certainly be created an Earl before the meeting of the Parliament.

His Majesty has been pleased to promote Robert Melvill, Esq; to the rank of Major General in the West-Indies only.

Aug. 15. His Majesty has been pleased to appoint the Hon. Col. Amherst, nephew of Sir Jeffery Amherst, to be one of his Aids-de-Camp.

It is said that an authentic account was brought on Thursday night from Paris of the French Ministry being now actually deliberating on an edict permissive of the full enjoyment of religious liberty, as in England; with a view that the Hugonots may no longer be driven to the painful alternative of either deserting their own country, or of residing within it in a constant state of hypocrisy.

A sumptuary edict was lately published at Stockholm, consisting of eighteen articles, in which the following, among other unnecessary merchandizes, are prohibited: 1. Coffee, chocolate, arrack, punch, strong waters, and most sorts of wine. 2. Confectionary. 3. The use of tobacco, except the person be 21 years of age. 4. The ladies to wear no trimmings, except it be the same sort with the rest of the gown. 5. All lace above an inch broad is prohibited. 6. The inferior women to wear no silk, except for caps. 7. The men to wear no velvet or silk stuff. 8. Silk or velvet furniture is also forbid. 9. Likewise gilding on the fixtures of houses. 10. No person under thirty to keep any horse of carriage in towns. 11. No person to keep any hayrues or running-footmen. 12. Or employ hair-dressers. 13. Or foreign tutors for children. 14. Oak coffins not to be made. 15. Plumies of feathers for hats forbid. 16. Likewise foreign china, except for tea. 17. Prohibited goods which were ordered before the edict to be exported within a year. 18. The edict to commence Jan. 1, 1767.

Thursd. prior woman, wife of a cork-cutter in Long-ally fields, was safely delivered of three fine boys. The woman last year had twin-daughters.

Aug. 2. day his serene Highness the Prince of Orange arrived in town from Holland, was introduced to his Majesty at St. James's, and was graciously received.

Some letter from Hanover inform, that an army of 25,000 men will be kept up in that Electorate.

It is said orders will soon be issued for parties of mariners to do duty on board his Majesty's ships of war at Portsmouth, Plymouth and Chatham. In ships of the line, a Captain first and second Lieutenant, and forty men; on board the frigates, a Lieutenant only, and thirty men.

It is talked, that provision will be made, next sessions, for augmenting the pay of Officers of marching regiments, and that the same be extended to Gentlemen of the army on half pay.

On Tuesday last arrived the Harriot Packet Boat, Captain Feltgen, in 6 Weeks and a Day from Falmouth, from whom we have the London Papers regularly, till the 14th of September, containing the following Advises.

WE hear from Portsmouth, that it is rumoured there, a considerable Naval Force will sail from thence for America, Part of which join Commodore Palliser on the Banks of Newfoundland.

It is reported that upon the news of France, of Mr. Pitt's being to be made Privy Seal, their East-India stock immediately twenty per cent.—Such are the dreadful apprehensions that our hereditary enemies entertain of future administration of a man whose vigorous successful measures, for this kingdom, have hitherto been so heavily felt by their grand monarch.

Different accounts from Spain inform, that there never was known greater expedition in the several sea-ports of that kingdom, in building and fitting out ships of war, than at present.

His Majesty has been pleased to appoint William Campbell, Esq; commonly called Lord William Campbell, to be Vice-Admiral of Nova-Scotia in North-America.

August 7. The Alarms propagated some Days past as if this Nation was on the Eve of an approaching Ruin, were, as we are informed, without the least Foundation.

Sept. 9. We hear that the Offer made to Prince Ferdinand of Brunswick, by the French Court, was 100,000 Crowns a Year, entire Command of the Army, and one of the King's Palaces to live in.

We hear from undoubted Authority, that the Salary to Lord Chatham, as Lord Privy Seal, is Three Thousand Pounds a Year; the same as his Grace the Duke of Marlborough and Lord Temple enjoyed, when they held that Office. And that the Public were misinformed with respect to the additional Salary of a Thousand a Year.

It is asserted, that there are near Seven Millions of Property invested in the East-India trade, immense Quantity of Shipping employed, Fleets and Armies maintained, and that almost every Man in these Kingdoms finds himself affected by its Prosperity, by Relation, by the Connection, and a thousand other Combinations.

The many Accounts, of the frequent Councils lately held on the Affairs of the Dutch, if not intended merely to amuse, are at least gross Misrepresentations of the Matter. The Truth, we are assured, is as follows. A mighty Monarch, who thinks himself injured by the Conduct observed towards him at the Conclusion of the late War, finding that a Negotiation, for a Marriage, was on the Carpet, ordered his Ambassador to demand the Prince in Question for a Niece of his own, intimating at the same Time, that in Case of Refusal, he had a large Army ready to obey his Orders. So peremptory a Message, from one ever accustomed to carry his Threats into Execution, could not but strike Terror, especially as Matters had already proceeded to a considerable Length with another Party. Couriers on Couriers were immediately dispatched. On one Side they are threatened with a Revival of old Claims, in Case of Non-Compliance; on the other, with instant Invasion. How to act in such a Crisis the poor distressed Republicans are at a Loss to tell. The Monarch it is known will not recede, and the opposition Party pretend great Firmness. Probably a double Portion may be required, one to complete the intended Marriage, the other (a much heavier one) to pacify the Wrath of the incensed Monarch.

Sunday arrived in Suffolk Street, his Serene Highness the Prince of Nassau.

Aug. 25. The marriage of the Prince of Nassau, with the Princess of Orange, on the 25th Crowned.

We hear that the Prince of Nassau has put up his Regiments, and that his Serene Highness the Prince of Nassau has been ordered to put up his Regiments.

We hear that the Prince of Nassau has been ordered to put up his Regiments, and that his Serene Highness the Prince of Nassau has been ordered to put up his Regiments.

It is talked that the Newfoundland fishery will next sessions be laid under certain beneficial regulations, like that carried on at Shetland, by intrusting the affairs thereof to a Society of Merchants, by the name of The Newfoundland Company.

Sept. 1. We hear that on Prince Henry's being ated Duke of Lancaster, the privileges and Eminent of that Dutchy which are very considerable, and belonging to the Chancellor, will be vested in the Royal Highness.

Sept. 1. We hear from Florence, August 9, that Duke Strozzi, Master of the Great Household, considering the unnecessary expense of Sweetmeats at the Celebration of Weddings, has thought proper, on Occasion of the Marriage of his eldest Daughter, to dispose of the Money which would have been spent on these Articles, among those who were in want of it. He accordingly gave Notice in his Parish, that 1250 Livres of our Money should be distributed in equal Portions among twelve poor Girls of good Character, and that eight Beds should likewise be given for the Use of such poor Families as should be named by the Curate: That on the Wedding Day he intended to divide Bread and other Provisions among all the necessitous Persons of the Place; to release a certain Number of Prisoners confined for Debt, and to give to each something to begin the World afresh; to remit his Tenants half their usual Service; and to give to the poor Families, from whom no Service is expected, a Gratification of 35 Livres.

August 21. Yesterday his Serene Highness the Prince of Nassau, was introduced to his Majesty at St. James's.

It is reported, that the Manilla Ransom will shortly be paid, both principal and interest.

It is confidently said, that the affair of the Antigua privateer will be revived.

We are informed a bill will be brought into parliament next sessions, for the better regulating American paper currency.

Orders are said to be issued from the War-Office for a great number of recruits to be raised with expedition to complete the regiments of foot stationed in North-America.

Sept. 11. The following Facts, from their being to be supported by the best Authorities, may be considered as indisputable, that of late Years our arable and rich pasture Lands have been greatly increased, our Tillage and Cultivation of all Kinds much improved, our National Population much diminished, and the Prices of all Provisions much increased; all of which together, must serve to manifest some great Defect in our Policy.

It is said, that notwithstanding the present ungrateful Clamours against Lord C—, he will shortly prove himself the Poor's best Friend, being determined immediately to procure a Prohibition of the Exportation of Corn, and also to promote several salutary Laws for their Benefit, next Sessions of Parliament, particularly with respect to Provisions and the additional Tax upon Beer.

It is said one eminent Cornfactor has Commissions for several Hundred Thousand Quarters of Corn to be sent to Italy.

It is said, that the Necessity of having Triennial Parliaments, will be strongly enforced in the House of Commons next Meeting.

Sept. 13. The Indian Chiefs, having finished their Business here, will embark in a few Days, on board a Merchant Ship in the River, for New-York.

Newcastle, Aug. 22. This most melancholy Accident happened at Lampton Colliery, near Chester in the County of Durham. The Workmen, a Number of above an Hundred, had but just set off Work, and three Masons, with as many Labourers, bent down in order to build a Partition, to secure the Coals from taking Fire by the Lamp; when the said Lamp being let down at the Request of the Masons, to rarify the Air, the latter, in an instant, took Fire with a terrible Explosion, and made its Way up the Pits, destroying many Horses, and all in its Passage.

The Noise of the Explosion was heard above three Miles distant, and the Flash was as visible as a Flash of Lightning, the Men below were drove by the Force of the Blast, through the Shaft, or great Tube, and a Cannon, and every Thing that was exposed to the same Fate. The Neighbourhood being alarmed, collected itself in order to give Assistance; but found only Heads, Arms, Legs, &c. thrown out to a great Distance from the Mouths of the Pits. The Grounds for Acres, was covered with Timber, Walls, &c. All the Partitions, Trap Doors, Covers, Wood Props, and Linings, were swept away, together with the Engine for drawing up the Coals, and all its Apparatus.

It is reported, that formidable fleets of ships of war, will shortly be sent to Spithead.

An order is said to be issued, that all the artificers, it is said, have been ordered to be taken into pay in the dock-yard at Portsmouth.

On Tuesday the 3d Instant, about Eleven o'clock at Night, a Number of Soldiers, said to belong to the 46th Regiment, entered into the House of per Hart, a Cartman, of this City; a very inoffensive Man, and without the least Provocation on the poor Man's Side, cut and wounded him in a terrible Manner, and dragged him into the Street so that it is next to a Miracle he was not murdered; not contented with using him in this Manner they went to his Stable, and there hamstringed his Horse, the only Means he had for his Subsistence on which the Guard was sent for, they immediately came and made search for the Person accused, and entering a House suspected of harbouring Soldiers, there found the Soldier, whose Clothes were stained with the Blood from the Wounds of the poor Man, he was immediately confined, and from the Endeavours of the Officers of the Army to assist the Magistrates, it is not doubted but he will receive condign Punishment.

Thursday last the new Episcopal Chapel, in this City, called St. Paul's, and esteemed one of the most elegant Edifices on the Continent, was opened, and dedicated to Almighty God. The Concourse of People of all Ranks and Denominations, (who attended on the Occasion) was very great.

At 10 o'Clock, the Council, Clergy, Church-Wardens, and Vestry of Trinity Church, the Mayor and Corporation of the City, waited on

ellency Sir Henry Moore, our Governor, at George: From thence they went in procession to Chapel, in the following Order, viz. The Mayor, Aldermen, and other Members of the Corporation, preceded by the Clergy of Trinity Church.

The Governor's Council. Their Excellencies, Sir HENRY MOORE, and Sir GAGE.

The Church Wardens and Vestry. Divine Service, which was adapted to this Occasion, an excellent Sermon was by the Revd. Doctor Samuel Auchmuty, Trinity Church. His Text was taken from 1. iii. 5. And he said, draw not nigh to off thy Shoes from off thy Feet; for the Lord thou standest is Holy Ground.

The Band of Music, vocal and instrumental, introduced. Several Pieces of Church and Psalms, were sung and played by them, at the usual Intervals; and the judicious contribution contributed much to heighten the

Whole was conducted with the greatest Decorum. The decent Behaviour of the Audience, of many Thousands of People, their Devotion during Divine Service, and fixed Attention to the Sermon, did Honour to themselves and to the

Doctor Sheridan, observes, "that the Principles of Education cannot be too soon imbibed." That Children ought to be trained in them from the very first Rudiments, when the plicant Organs are easily formed to any sound, and before Prejudice or evil Habit shall have taken Root." To advance this useful Part of Learning, it is proposed that generally once in a Month, during the Spring and Summer Seasons, the Ladies shall publicly recite some select Pieces, committed to Memory from our best English Writers. This, it is imagined will excite a laudable Emulation to excel in the Art of Delivery.

THE Grammar School which hath some Time past been taught at Elizabeth-Town, to universal Acceptance by Mr. T. Proposals for teaching the Latin Language, so that the Student may save three-Fourths of his Time and above Half of his Money.

THE Subscriber, lately a Tutor of the College of New-Jersey, proposes to teach a *very few* Boys the Latin Language. — The Number of Students will not exceed Six. — The Mode of teaching will be somewhat new, and perhaps, has never been before practised, in America at least. But, tho' I make no Secret of the Mode, yet, the Public are not so much concerned in knowing that, as my Terms.

If I teach the Latin Language, in one Year, so that at the Year's end (Sickness and unforeseen Accidents excepted) the Student appear, on Examination, to be well acquainted with it; not only as well as most in any College on the Continent are, at their commencing Bachelors of Arts, but be able with Propriety and Facility to translate Latin into English and English into Latin, and understand the Grammatical Construction; then, I shall expect £.40 Proc. but, if I fail in the Attempt, then I shall expect no Compensation.

To be taught thus, would be far the cheapest for the Student; which may appear from the following Considerations.

'Tis well known, that, at the Rate Youth are generally taught, one of an indifferent or middling Genius, would require at least 4 Years to obtain a competent Knowledge of the Latin Language; such a Knowledge I mean, as has been just now mentioned.

In each of these 4 Years, suppose the Student to expend for Tuition £.4, for Board £.26, for Apparel and other Expences £.30, in all £.60 per Annum, which in 4 Years amounts to £.240. This then is the whole Expence of the Student, while learning the Latin Language, after the usual Rate of teaching.

Again supposing a Student learns the Latin Language in one Year, according to the Proposal above mentioned. In this Year, suppose the Student to expend for Tuition £.40 for Board, £.26, for Apparel and other Expences £.30, in all £.96. This then is the whole Expence of the Student, while learning the Latin Language after the Rate proposed.

Thus we see, that above £.140 is saved, besides 3 Years of precious Time.

If, besides saving his Time and his Money, he should learn the Language, not only without that wearisome groping, which disgusts almost every Youth, and in many, fixes a lasting Aversion to Study; but should even contract every Day, a greater Fondness and Relish for Study, which Fondness 'tis highly probable he would retain all his Life after; then, I refer to all who have ever thought of the Preciousness of Time, of the painful Fatigue which Grammar-School Boys generally undergo, and of the Valuableness of a Relish for Study; whether it would not be a good and cheap Bargain, for a Youth to pay not only £.40, but even a Hundred Pounds to be thus taught. If I cannot infuse into the Mind of the Student such a Love for Learning, and make his Business his Pleasure and Delight; I am sure I shall lose my Fee, and (what is of incomparably greater Value) the Pleasure of doing Good.

I propose to make Elocution a Part of the Student's Diversion; so that, I hope, at the Year's End, he will be able to speak with considerable Grace and Energy.

The Subscriber at present resides at Princeton, and designs to open his School there.

The School will be opened on the Tenth of November, after which Time none may expect Admission except those who have already been encouraged.

No Abatement or Allowance will be made for such as have spent any Time at the Latin: The Subscriber would prefer such as never have.

He would choose that all his Scholars lodge in the same House with himself, and he will be careful to choose for himself and them the best Lodgings that can be had.

The Subscriber trusts, that the Good of the Public has incited him to hazard a Proposal, from which the Public can receive no Injury, but will if the Attempt succeed) evidently receive a great Advantage.

With Respect to the Success I shall only say thus much, Tho' I have in my Power to produce the Authorities of great Men, and Arguments which to them appeared convincing, and what is more than all this, tho' I might cite even Fact itself, to prove that we may hope the Success will be extraordinary;

yet, I choose to wave all these Things, not doubting but (if God spare my Health) we may soon see, with our own Eyes, the Success evinced by restless Facts.

'Tis hoped, the Public will interpret this Proposal in the most charitable Sense, and not consider the Author as renouncing Modesty in pretending to teach with so uncommon Success. — The Excellency of the Mode (not of the Teacher) and the advantageous Circumstances of the Students, are the Sources from whence the Subscriber derives all his Encouragement.
